

The University Speech-Language-Hearing Clinic (USLHC) provides services to infants, children, and adults with speech, language, and/or hearing impairments. These services include testing and treatment and are provided by graduate student clinicians under the supervision of licensed speech-language pathologists and audiologists.

## **SPEECH/LANGUAGE SERVICES FOR CHILDREN**

### ***Speech/Language Evaluations***

Pediatric (child) communication skills are assessed by a diagnostic team of graduate student clinicians and professionals. Skills evaluated may include articulation (speech sounds), fluency (stuttering), voice, language skills, and social skills.

### ***Speech/Language Treatment***

Therapy services for a variety of communication disorders, namely articulation, fluency, voice, language, social, and literacy, are provided in individual and/or group settings.

### ***Language Learning Group (LLG)***

Intensive language stimulation is provided for children from two to four years of age. This group meets two days a week for two and a half hours and has a maximum enrollment of six children.

### ***Cougar Communication Groups***

Speech and language services are provided in a group setting during the summer. Innovative therapy focuses on speech, language, social, voice, literacy, and other communication disorders.

## **AUGMENTATIVE AND ALTERNATIVE COMMUNICATION (AAC) FOR ADULTS AND CHILDREN**

Evaluation and therapy services are provided to adults and children with severe communication impairments who require basic and/or high-tech aided systems to communicate.

## **SPEECH/LANGUAGE SERVICES FOR ADULTS**

### ***Communication Services***

Evaluation and therapy services are provided to individuals who develop disorders of speech, voice, language, or cognition in adulthood (e.g., due to stroke, disease, or brain injury). Individual and group sessions are available.

### ***Post-Stroke Communication Groups***

Group members practice using functional communication skills and compensatory strategies for community living. This program is appropriate for individuals with aphasia no longer eligible for hospital-based rehabilitation who continue to benefit from long-term comprehensive speech-language therapy.

### ***American English Accent Training***

Services are available for individuals who wish to refine their pronunciation of General American English (GAE).

## **APPOINTMENTS**

To schedule an appointment for clinic services, call (713) 743-0915 or email [uslhc@uh.edu](mailto:uslhc@uh.edu). The clinic is open Monday to Friday, 8:00am to 5:30pm.

## **FEES**

Fees are based on a sliding scale. All clients are eligible to apply for reduced fees.

**A Hearing Aid Assistance Program is available to eligible clients.**

## **HEARING SERVICES FOR ADULTS AND CHILDREN**

### ***Hearing Screenings***

Community and clinic-based hearing screenings for children and adults are provided by graduate students under the supervision of licensed audiologists and speech-language pathologists.

### ***Hearing Evaluations***

Evaluations to determine the type and severity of hearing loss are administered by a licensed audiologist and are available to adults and children ages 2 and older. Medical referrals to doctors who specialize in ear disorders are provided when necessary.

### ***Hearing Aid Evaluations/Consultations***

Evaluations and consultations are available to adults and children ages 2 and older. Recommendations for amplification are made based on the type and severity of hearing loss.

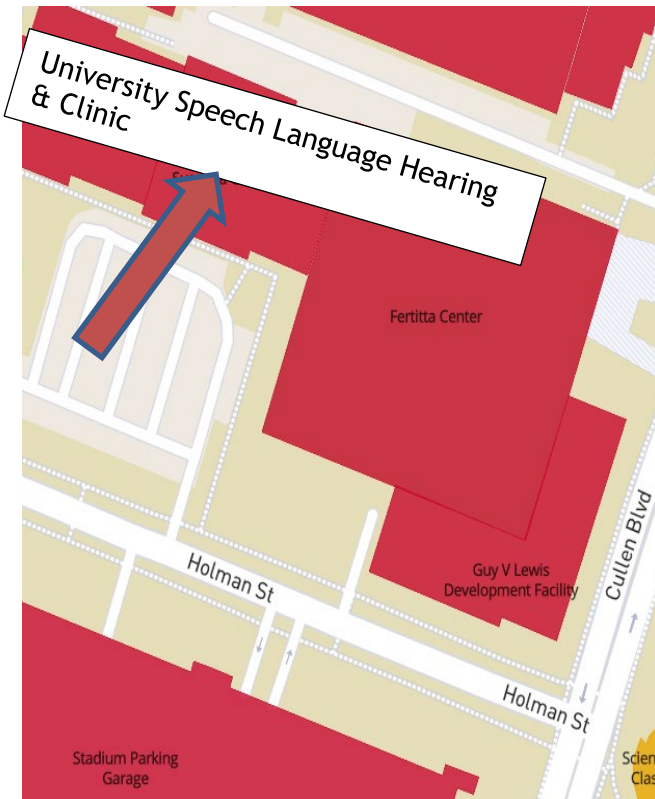

### ***Aural Rehabilitation Services***

Listening with amplification can be challenging at first and may require some time to adjust. Training provided to manage a hearing loss includes informational counseling, speech-reading, listening strategies, adjustment to amplification, and speech and language activities.

Equitable Treatment Services at the USLHC are available to all people, regardless of race, creed, gender, or national origin.
